PRE-ORDER LIST: September 2016

www.facebook.com/orchidphile
(203) 329-7255

IMPORTANT! Address all correspondence & orders to: orchidphile@optimum.net
(Please mention "Plant Pre-Order" & note the particular event or Mail Order in the subject line)

This list replaces & supersedes all previous lists. All orders are filled in the order in which they are received and are subject to prior sale.

Prices are listed in US Dollars

OF SPECIAL NOTE: We have now added a new section to show some of our first-bloom One-of-a-Kind novelty seedlings (not mericlones), many of which are from Dragon Tree Eagle breeding lines that we've purchased from some of the cutting-edge breeding programs in Taiwan. These are available on a First Come-First Serve basis ~ and each photo is of the actual seedling being offered.

We've also expanded our collection of **miniature Vandaceous, miniature Dendrobiums & other genera** ~ all of which grow & flower happily with our Phals.

Most plants are in 2.7" pots as first or second bloomers unless otherwise noted as being fully mature in 4" pots

PLEASE NOTE: Stock quantities of 6 or fewer are noted as "Limited" ~ single plants are marked (1)

ORDERING INFORMATION FOR OUR MAIL ORDER CLIENTS:

In the winter or during inclement weather, shipments may be delayed pending more moderate weather conditions. Shipping is either via FedEx Ground or Air depending on final destination. We reserve the right to withdraw any offering from sale and to limit quantities.

We guarantee all plants to be true to identity to the best of our knowledge. We make no warranty as to the productiveness of any plants sold since culture conditions vary widely. Our responsibility shall only be limited to the purchase price.

Although we do our utmost to pack carefully, we are not responsible for damage to buds or flowers due to shipping ~ risk is assumed by buyer for buds or flowers on plants shipped at this stage. However, safe arrival of a healthy orchid plant is guaranteed.

Shipping And Packing Charges:

Based on the total of your order, a minimum of 10% for packing plus the actual FedEx shipping cost will be charged.

SIZE DEFINITIONS:

- PF = Previously flowered
- F = Currently in flower (single spike unless otherwise noted)
- B = In bud (single spike unless otherwise noted)
- SP = In spike, just initiating to medium spike stage (no buds showing yet)
- BS = Blooming size (most have just flowered & should flower again in season)
- NBS = Near blooming size (approximately 1 year to flowering in season)
- S = about 2-3 years to flowering

PHAL SPECIES:

Most of these Phalaenopsis species are from Taiwan & were sibbed or selfed using very select parents

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. aphrodite subsp. formosana 'A09001' (4N)</p> <p><i>(TETRAPLOID FORM of Species)</i></p> <p><i>A dynamite sibbing of this favorite of all Phal. species ! This population is a tetraploid form, producing more compact leaves and beautifully round flowers with great substance, producing a long-lasting display with a much smaller footprint than is typical for the species. Gracefully cascading spikes make for a stunning display !</i></p>	<p>SP</p> <p>(1)</p> <p>4" pot</p>	<p>\$ 38</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. bellina fma. coerulea</p> <p style="text-align: center;"><i>(Sib Cross of FRAGRANT Species)</i></p> <p><i>The fragrant & beautiful Phal. bellina in a new color form ! Typically, Phal. bellina has a central pink blush/flush on all its segments ~ however, this strain has a more coerulean blue to lavender flush which, along with its deep lavender lip, makes quite a statement. This species tends to continue to flower again on older inflorescences in addition to producing new so don't remove them unless they turn yellow. We're guessing this group is about a year to flowering & yet we've seen a couple spike up already showing their increased vigor as a sib cross ~ they sold immediately !</i></p> <p style="text-align: center;">FRAGRANT !</p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p> <p style="text-align: center;">COLOR VARIABLE</p> <p style="text-align: center;">CHING HUA NURSERY, TAIWAN</p>	NBS	\$ 35
	<p style="text-align: center;">Phal. celebensis</p> <p style="text-align: center;"><i>(Sib Cross of Species)</i></p> <p><i>Endemic to Sulawesi, this miniature species has beautifully mottled silvery grey-green leaves making it an attractive addition to any collection, even when not in flower ! Usually flowering from late summer to early fall, its tall inflorescences can literally be covered with successively opening semi-peloric flowers, all presented on a gracefully cascading display. This particular Phalaenopsis species is one of the few that does better in shade, kept moist year 'round. Not often available & a really unique treasure !</i></p> <p style="text-align: center;">MINIATURE !</p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p> <p style="text-align: center;">JIAHO NURSERIES, TAIWAN</p>	NBS/BS	\$ 35

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. hieroglyphica fma. alba</p> <p style="text-align: center;"><i>(RARE Color Form of Species: 'Golden Promise' AM/AOS x self)</i></p> <p><i>The rare alba form of Phal. hieroglyphica which we find much more charming than the common white & burgundy form. For an alba form these have been extremely vigorous growers & a few from this group have flowered already. Always leave the previously flowered spike on the plant since they do tend to add additional buds while making a new spike or two.</i></p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p>	<p style="text-align: center;">BS</p> <p style="text-align: center;">(1)</p>	<p style="text-align: center;">\$ 48</p>
	<p style="text-align: center;">Phal. japonica</p> <p style="text-align: center;"><i>(Species - formerly known as Sedirea japonica)</i></p> <p><i>A great and easy-growing miniature species (just re-classified as a Phalaenopsis) with delightfully fragrant cascading spikes of small waxy flowers ! These are mature blooming size plants, their flowers crisply marked with rich rose-burgundy & an outrageously accented lip. From the first group we had imported, we discovered that after cutting back their spring flower spikes, almost every plant was spiking again ! When fully mature, this species is capable of putting on quite a show !</i></p> <p style="text-align: center;">FRAGRANT MINIATURE</p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p>	<p style="text-align: center;">PF</p> <p style="text-align: center;"><i>Limited</i></p>	<p style="text-align: center;">\$ 42</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. javanica</p> <p style="text-align: center;"><i>(Species: 'Montclair' x self)</i></p> <p><i>Not often available, this strain is the result of a selfing of an extremely good form of this species ! Very compact pendulous spikes produce small flowers cascading over or between compact round leaves. Again, we've found this species does better in our greenhouses when grown a little cooler & shadier at a lower bench level. And for its best flowering display, many growers mount this species.</i></p> <p style="text-align: center;">MINIATURE SPECIES</p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p>	<p>NBS/BS</p> <p><i>Limited</i></p>	<p>\$ 45</p>
	<p style="text-align: center;">Phal. philippinensis</p> <p style="text-align: center;"><i>(Species)</i></p> <p><i>Found only in the Philippines, this small growing species has beautifully marked mottled leaves & pristine white flowers on freely branching inflorescences. The particular charm of this species is its uniquely shaped lip with rich yellow side lobes. A fully mature plant will produce a shower of flowers on gently cascading spikes, usually in the late fall to early winter. Grow on the shadier side as evidenced by its mottled foliage.</i></p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p>	<p>NBS</p> <p><i>Limited</i></p>	<p>\$ 28</p>
	<p style="text-align: center;">Phal. pulcherrima 'Royal Fuchsia' (4N)</p> <p style="text-align: center;"><i>(SELECT CLONE of Species)</i></p> <p><i>Glowing fuchsia flowers grace this particular tetraploid clone of Phal. pulcherrima ! With its fabulously compact leaves & growth habit, this species can readily form basal keikis, in time producing a specimen plant for the most dramatic display. An easy grower which is temperature tolerant, this tetraploid form is producing more vigorous growth with longer lasting flowers !</i></p>	<p>BS</p> <p><i>Limited</i></p>	<p>\$ 42</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. speciosa var. christiana 'C#1' JC/AOS</p> <p><i>(Syn. Phal. tetraspis – Two-color form of Species)</i></p> <p>Just reclassified as Phal. speciosa, this unique clone of the species produces two-color flowers as opposed to the typical pure white or white-with-erratic-bars form. Each flower on its spike is slightly different from the next in the expression of solid red on its segments, making for a wonderful and surprising display. A selfing of this form has already produced totally red flowers. As a summer bloomer, the intensity of red in each flower is influenced by light and temperature during its formation. Older spikes will continue to produce buds the following year in addition to new spikes forming. This has become an important parent in some of the newest and most exciting hybrids from Taiwan when bred with other species or primary hybrids.</p> <p>UNIQUE FORM OF SPECIES !</p>	<p>SP/B <i>(1)</i></p>	<p>\$ 55</p>
	<p>Phal. speciosa</p> <p><i>(Species sib cross: 'Purple' x 'Dark')</i></p> <p>This sib cross was created using the two solid color forms shown on the left, both of them being progeny from a sibbing of the clone 'C#1'. The intense red-purple color from 'C#1' is spread out over all the segments of their flowers creating a stunning solid colored flower. Since this is a sib cross & not a mericlone, we cannot guarantee that every seedling will flower solid ~ some may take after 'C#1' (which is also a sensational flower) with the rest being more heavily marked or totally solid like their parents. A great reason to flower more than just one !</p> <p>FRAGRANT !</p> <p>CHING HUA NURSERY, TAIWAN</p> <p>ONE-OF-A-KIND SEEDLINGS !</p>	<p>NBS/BS</p>	<p>\$ 42</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. violacea fma. coerulea (Indigo form sib cross)</p> <p><i>(Species)</i></p> <p><i>A sib-cross of this fragrant species coming from two dark coerulea parents ! These have been vigorous growers and might very well make their first spikes this summer. As a sib cross, there will be some variation in the intensity of blue from one seedling to the next.</i></p> <p>FRAGRANT !</p> <p>ONE-OF-A-KIND SEEDLINGS !</p> <p>COLOR VARIABLE</p> <p>CHING HUA NURSERY, TAIWAN</p>	NBS/BS	\$ 42
	<p>Phal. violacea fma. Malaysia (Species)</p> <p><i>Beautiful fragrance, beautiful leaves, stunning flowers ! A summer to fall bloomer, this sibbing has produced flowers ranging in color from pink to rich magenta. A result of mating two select forms of the species, this form of Phal. violacea is not often available. Grow under lower light conditions than that for Phalaenopsis hybrids and keep evenly moist (not wet) for your best flowering. A "must have" for any Phal. species collection !</i></p> <p>FRAGRANT !</p> <p>ONE-OF-A-KIND SEEDLINGS !</p> <p>JIAHO NURSERIES, TAIWAN</p>	<p>SP</p> <p>(1)</p> <p>2 spikes !</p>	\$ 58

MULTIFLORAL MINIATURES, COMPACT-GROWING BRIGHTLY COLORED NOVELTIES & EVEN SOME LARGER-FLOWERING STUNNERS:

Again, most of these clones are the result of the excellent Taiwanese breeding programs.

Many of the plants below were hand-picked from select nurseries over the last several years on our annual trips to Taiwan.

PLEASE NOTE: *With many of the harlequins & the red or orange novelties, differences in light & temperature at various times of the year will cause some variation to occur in the flower color and/or intensity of their markings. Under warmer temperatures & more shaded conditions in the summer, many red hybrids with yellow or orange in their breeding background will flower showing more of those colors. Under cooler temperatures & brighter light in the fall to winter months, the red pigment in the flowers is more strongly expressed resulting in solid red flowers.*

Also, many of the Phal. bellina and/or violacea-influenced novelties improve in color intensity, size and fuller form on their 2nd & 3rd flowerings, as do the actual species themselves.

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p align="center">Phal. Dragon Tree Eagle 'DT168'</p> <p align="center"><i>(Penang Girl x Black Eagle)</i></p> <p>THE backbone of today's exciting novelty hybrids – and still the best for this line of breeding – Phal. Dragon Tree Eagle is a MUST HAVE for every Phalaenopsis collection ! Brilliantly colored novelty-size fragrant flowers are produced on very compact spikes over equally compact leaves. In spike now, it should flower for the first time, with 1-2 flowers, in a couple of months. Creates a dramatic display of vividly contrasting colors and patterns & will draw the eye from anywhere !</p> <p align="center">FRAGRANT WAXY NOVELTY !</p> <p align="center">DRAGON TREE NURSERY, TAIWAN</p>	<p align="center">PF</p> <p align="center">(1)</p> <p align="center">In spike !</p> <p align="center">NEW !</p>	<p align="center">\$ 95</p>
	<p align="center">Phal. Formosa Mini 'Taida Pinky'</p> <p align="center"><i>(Modern Stripes x Cassandra)</i></p> <p>A great little candy-stripe multi-floral miniature with a ready branching habit reflecting the newest generation of candy-stripe minis ~ the flowers are actually a richer pink than the photo shows with even darker candy striping. Compact gently cascading spikes that, as first bloomers, are already showing their vigor by producing two branching spikes in just 2.7" pots. The best possible mix of a great larger-flowered candy stripe pod parent miniaturized by the influence of Phal. Cassandra, a multi-floral miniature & proven breeder !</p> <p align="center">MULTI-FLORAL MINI !</p> <p align="center">TAIDA NURSERY, TAIWAN</p>	<p align="center">B/F</p> <p align="center">2</p> <p align="center">branching spikes !</p> <p align="center">First bloomers !</p>	<p align="center">\$ 25</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Fuller's Gold Stripe 'OX1560'</p> <p><i>An especially charming clone of this multi-floral miniature ! Unlike the other commonly available clones of this same hybrid, this particular clone produces extremely round well-balanced flowers on very compact branching spikes – its striping and red lip are also much more vivid and well-defined than its siblings – its presentation beautifully set off by a central white flush with its flower size takes after the multi-mini parent. These heavy substance flowers lead us to wonder if they're 4N – and their heavier substance means a longer-lasting display. If we could only grow one clone of Fuller's Gold Stripes, this would be it !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! OX NURSERY, TAIWAN</p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;"><i>2 spikes !</i></p>	<p style="text-align: center;">\$ 25</p>
	<p style="text-align: center;">Phal. Gan Lin Pearl 'King'</p> <p style="text-align: center;"><i>(Taida Pearl x Yu Pin Pearl)</i></p> <p><i>A classic example of today's cutting-edge harlequin breeding ! Pristine white flowers are kissed centrally with bold burgundy-red harlequin accents. Naturally cascading spikes with classically large flowers !</i></p> <p style="text-align: center;">GAN LIN NURSERY, TAIWAN</p>	<p style="text-align: center;">SP</p> <p style="text-align: center;"><i>(1)</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 25</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Gan Lin Small Shell 'GL179'</p> <p><i>We finally have this great mini harlequin back in stock, a great little hybrid reflecting the newest in multi-floral miniature harlequin breeding ! With their stable harlequin patterning from one flower to the next, these little plants are already producing 2 spikes in just 2.7" pots. Expect vigorous branching as the plants reach full maturity !</i></p> <p style="text-align: center;">GAN LIN NURSERY, TAIWAN</p> <p style="text-align: center;">MULTI-FLORAL MINI</p>	<p style="text-align: center;">SP</p> <p><i>2 spikes</i></p> <p><i>Limited</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 33</p>
	<p style="text-align: center;">Phal. Green Field Fortune Cat 'GL137'</p> <p><i>A new yellow harlequin multi-floral miniature with the flowers heavily marked with a dark burgundy-black harlequin overlay ! Very compact branching spikes over an equally compact leaf span, complete with heavy substance flowers. The newest direction in breeding for those elusive multi-floral miniature yellow harlequins !</i></p> <p style="text-align: center;">GREEN FIELD NURSERY, TAIWAN</p> <p style="text-align: center;">MULTI-FLORAL MINI</p>	<p style="text-align: center;">B/F</p> <p><i>Limited</i></p> <p style="text-align: center;">2 branching spikes !</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 25</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. K S Sweet Diamond 'A08118'</p> <p style="text-align: center;"><i>(Ching Ann Diamond x Sogo Golden)</i></p> <p><i>A great mating of a multi-floral miniature with a waxy novelty ! Ching Ann Diamond, a rich pink multi-floral, brings floriferousness to this hybrid while Sogo Golden, a waxy yellow novelty flower, gives it heavy substance & gives the flowers their beautiful sunset/salmon color.</i></p> <p style="text-align: center;">TAIDA NURSERY, TAIWAN</p> <p style="text-align: center;">MULTI-FLORAL MINI</p>	<p style="text-align: center;">SP</p> <p style="text-align: center;"><i>2 spikes !</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 33</p>
	<p style="text-align: center;">Phal. Lioulin Moon 'OX1533' FCC/AOS</p> <p style="text-align: center;"><i>(Phal. Tai-I Yellow Bird x Sogo Rosa)</i></p> <p><i>This particular clone of Lioulin Moon knocked everyone out with its color & floriferousness at the Taiwan Show ! Heavy substance brilliant yellow flowers of great full form are accented centrally with just a kiss of harlequin. And when fully mature, it can produce quite a show with multiple branching spikes. Of all the novelty-size yellow harlequins we've seen, this one is still our #1 favorite !</i></p> <p style="text-align: center;">OX NURSERY, TAIWAN</p>	<p style="text-align: center;">PF</p>	<p style="text-align: center;">\$ 33</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Lioulin Peacock 'A09616'</p> <p style="text-align: center;"><i>(Taida Salu x Tai-I Yellow Bird)</i></p> <p><i>An arresting rich yellow harlequin showing the newest in this line of harlequin breeding ! Intensity and degree of expression of harlequin accents will vary according to light and temperature but is always a dramatic result, be it a heavy suffusion of harlequin accents or not. With its waxy long-lasting flowers it tends to continue to produce spikes and buds, even while retaining previously flowered spikes ! First bloomers.</i></p> <p style="text-align: center;">NOVELTY HARLEQUIN !</p>	<p style="text-align: center;">SP</p> <p><i>1-2 spikes</i></p> <p><i>Limited</i></p>	<p style="text-align: center;">\$ 28-33</p>
	<p style="text-align: center;">Phal. Lioulin Sparrow 'Taida Little Panda'</p> <p style="text-align: center;"><i>(Phal. Tai-I Yellow Bird x Sogo Rosa)</i></p> <p><i>A multi-floral miniature version of the larger flowered waxy yellow harlequins – this little hybrid's dark harlequin spotting is created by one layer of black-burgundy over another, all against a soft yellow background, its harlequin blotch almost totally covering each flower. This particular clone is super compact versus other clones of this hybrid, the spikes reaching no taller than 6-8" from the rim of the pot & vigorously branching. Very heavy waxy substance, extremely compact spikes and leaves, and a prolific brancher !</i></p> <p style="text-align: center;">MULTI-MINI HARLEQUIN !</p>	<p style="text-align: center;">SP/B</p> <p><i>Limited</i></p>	<p style="text-align: center;">\$ 28</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Little Gem Stripes 'GL174'</p> <p style="text-align: center;"><i>(Taisuco Stripe x Taisuco Gem)</i></p> <p><i>Not your everyday white multi-floral miniature, this particular clone of Little Gem Stripes carries a bold red lip that makes the whole presentation really stand out ! Compact branching spikes produce a generous display of mini whites with the punch of a bright red lip. Although the flowers open showing some of the striping from Taisuco Stripe, as they mature the striping totally disappears, leaving a pure white multi-floral mini with a great red lip. This hybrid is the absolute favorite in Taiwan for further breeding of multi-minis for its full-form flowers, compact spikes & leaves & its stunning blood-red lip!</i></p> <p style="text-align: center;">MULTI-FLORAL MINI !</p> <p style="text-align: center;">FROM GANLIN NURSERY, TAIWAN</p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;">2 spikes !</p> <p style="text-align: center;">Limited</p>	<p style="text-align: center;">\$ 25</p>
	<p style="text-align: center;">Phal. Liu's Gold Coin 'KF'</p> <p style="text-align: center;"><i>(Ho's Kuangfeng Glory x lobbii)</i></p> <p><i>One of very few Stem Props made by Mr. Liu of this fabulous & rarely available micro-mini ! Known for his very special breeding program using Phal. lobbii & Phal. parishii, Mr. Liu wanted a great golden-yellow mini with an extremely small footprint. Showing the strong influence of Phal. lobbii in its broad lip, super compact spike & leaf habit, its brilliant color comes from the pod parent, Ho's Kuangfeng Glory. An easy grower unlike its Phal. lobbii parent & deserving of a place in every serious Phalaenopsis collection ~</i></p> <p style="text-align: center;">MICRO-MINIATURE</p> <p style="text-align: center;">FROM LIU'S NURSERY, TAIWAN</p>	<p style="text-align: center;">BS</p> <p style="text-align: center;">(1)</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 95</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Mituo Golden 'Mituo #1' AM/AOS</p> <p style="text-align: center;"><i>(Taida Diamond Star x Dragon Tree Gold)</i></p> <p><i>Brilliant canary yellow waxy flowers accented with a bold central harlequin blotch ! This particular clone has extremely stable patterning from one flower to the next and is capable of producing over 8 flowers on each inflorescence, a plus for waxy novelty breeding. We still feel it's one of the very best in non-fading yellow harlequins !</i></p> <p style="text-align: center;">KEIKI FROM OUR MOTHER PLANT !</p> <p style="text-align: center;">MITUO NURSERY, TAIWAN</p>	<p style="text-align: center;">BS</p> <p style="text-align: center;">(1)</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 95</p>
	<p style="text-align: center;">Phal. Natsume's Berry 'Little Treasure'</p> <p style="text-align: center;"><i>(Note: this was just registered with the RHS under the above name rather than as Phal. Ebony Sweet Gem as previously expected)</i></p> <p style="text-align: center;"><i>(Orig: Phal. (Yu Pin Natsume x Fuller's Berry) 'OX 1659')</i></p> <p><i>Another clone using the great miniature harlequin parent, Fuller's Berry ! Combined with Yu Pin Natsume, it has created cardboard-substance flowers that are almost black & are FRAGRANT...our photo, shot at the show with a flash, doesn't begin to capture how really "almost black" these flowers are (due to the flash reflecting back to the camera). They are really as "black" as the Fredclarkara's or the Millenium Magics thanks to the rich harlequin pollen parent, Fuller's Berry ! Mated with Yu Pin Natsume, another heavily marked harlequin mini, its rich dark color is the result of layer upon layer of harlequin suffusion coming from both parents, producing a thick flower with heavy color pigment and no hint of any other color. These plants have already flowered once, producing 2 branching spikes in just a 2.7" pot and will continue to produce flowers on previously bloomed spikes in addition to creating new...a couple which were cut back just 2 months ago are already spiking again. A cutting-edge "almost black" multi-floral mini !</i></p> <p style="text-align: center;">FRAGRANT !</p> <p style="text-align: center;">MULTI-FLORAL WAXY MINI !</p> <p style="text-align: center;">OX NURSERY, TAIWAN</p>	<p style="text-align: center;">PF</p> <p style="text-align: center;">Limited</p>	<p style="text-align: center;">\$ 95</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Dtps. OX Firebird 'OX1506'</p> <p><i>(OX Black Jack x Walnut Valley Halo)</i></p> <p>One of the most dramatic of the newest generation of Harlequin breeding ! Consistent patterning from one flower to the next with only slight variations in intensity according to light and temperature – large flowers are produced on readily branching & gracefully cascading spikes. This one will draw your eye from any part of a room !</p> <p>NEW HARLEQUIN !</p> <p>FROM OX NURSERIES, TAIWAN</p>	<p>SP</p> <p>2 spikes</p> <p>4" pots</p> <p>Limited</p> <p>NEW !</p>	<p>\$ 42</p>
	<p>Phal. OX Golden Apple 'OX1573'</p> <p><i>(Fusheng Sweet Paradise x OX Spot Queen)</i></p> <p>Phal. OX Golden Apple has produced some sensational progeny ! This particular clone gives the appearance of soft apricot flowers as a result of a yellow base color overlaid with a wash of pink and light striping revealing a central yellow halo. Large 3.5-4" flowers have beautiful full form & gently cascade along their spikes, spaced perfectly for the best viewing of each flower. Unique & a glowing addition to any collection !</p> <p>OX NURSERY, TAIWAN</p>	<p>SP/B</p> <p>Limited</p> <p>First bloomers</p> <p>NEW !</p>	<p>\$ 28</p>

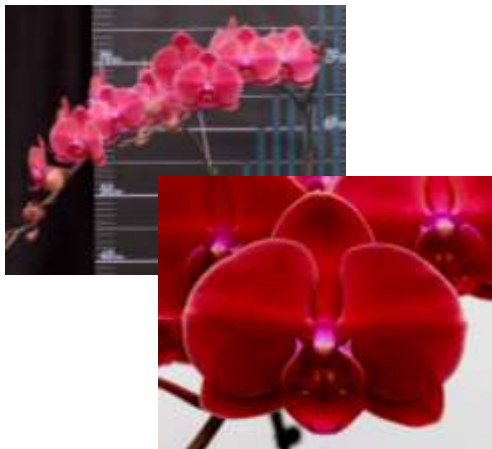

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. OX Golden Apple 'OX1595' AM/AOS</p> <p style="text-align: center;"><i>(Fusheng Sweet Paradise x OX Spot Queen)</i></p> <p>Just awarded at the Taiwan International Orchid Show, this is an outrageous new novelty-size harlequin with stable & unique patterning which is consistent from one flower to the next ! This is the only clone from this cross that has been dominant for its harlequin heritage. Non-fading golden yellow flowers, 9cm in size, are kissed with a touch of white around their harlequin-haloed column, with the harlequin patterning radiating out & leaving a narrow yellow picotee around all the segments. Beautifully finished with a bold ruby-red lip, this clone from OX Nurseries took on the best of both parents producing a flower totally different from the rest of this hybrid's progeny. A must for the newest in yellow harlequin breeding !</p> <p style="text-align: center;">OX NURSERY, TAIWAN</p>	<p style="text-align: center;">PF</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;">4" pots</p> <p style="text-align: center;">PF</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;">3" pots</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 38</p> <p style="text-align: center;">\$ 28</p>
	<p style="text-align: center;">Phal. OX Golden Apple 'OX1599' AM/AOS</p> <p style="text-align: center;"><i>(Fusheng Sweet Paradise x OX Spot Queen)</i></p> <p>This OX Golden Apple has the heaviest overlay of red for this hybrid, producing its vivid color ! We saw and awarded this particular clone at the 2013 Taiwan International Orchid Show, bearing 24 flowers of 8.8cm on two gracefully arching inflorescences. A great result of mixing parents with heavy yellow heritage, harlequin background and French spots, its color has resulted from a fusing of all its background parentage into one solid stunning color, its segments perfectly outlined with a narrow yellow picotee !</p> <p>NOTE: Its color intensity varies according to light & temperature with brighter light & cooler temperatures producing the most vivid orange-red flowers ~ warmer temps with more shading produce flowers that are more orange-salmon in color.</p> <p style="text-align: center;">OX NURSERY, TAIWAN</p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;">2 spikes !</p> <p style="text-align: center;"><i>First bloomers</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 33</p>

Readily branching spikes are produced in perfect proportion to the plant, creating a bountiful display of its unique color combination.</p> <p style="text-align: center;">SOGO NURSERY, TAIWAN</p>	<p style="text-align: center;">PF</p> <p style="text-align: center;">(1)</p> <p style="text-align: center;">4" pot</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 35</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Sogo Yukidian 'V3' CCE/HCC/AOS</p> <p style="text-align: center;"><i>(Yukimai x Taisuco Kochdian)</i></p> <p><i>The ultimate super-star of all classic whites ! This particular clone creates dramatically & naturally cascading spikes, the flowers presented so each one can be enjoyed without being crowded on the spike. Heavy substance large flowers, reaching up to 5" across on a fully mature plant. If you only have room for one classic white, this is THE ONE. Simply stunning and amazingly dramatic !</i></p> <p style="text-align: center;"><i>SOGO NURSERY, TAIWAN</i></p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;"><i>First bloomers !</i></p> <p style="text-align: center;"><i>2 spikes !</i></p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;"><i>NEW !</i></p>	<p style="text-align: center;">\$ 33</p>
	<p style="text-align: center;">Phal. Taída Blush 'Taída Pink Butterfly'</p> <p style="text-align: center;"><i>(Hilo Lip x Malibu Blush)</i></p> <p><i>Even as first bloomers in just 2.7" pots, these plants have produced gracefully cascading spikes – once fully mature, their flower presentation will be outrageous ! With attractively round leaves, in perfect proportion to the spikes, this hybrid is a <u>much</u> easier grower than the difficult Hilo Lip, thanks to the pollen parent's influence. Yet it maintains that beautiful pristine white lip in contrast to the rich pink flower. Just seems to stand out from anywhere !</i></p> <p style="text-align: center;"><i>TAIDA NURSERY, TAIWAN</i></p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;"><i>2 spikes !</i></p> <p style="text-align: center;"><i>First bloomers !</i></p> <p style="text-align: center;"><i>NEW !</i></p>	<p style="text-align: center;">\$ 33</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. Taida Golden Diamond 'Taida Black-naped Oriole'</p> <p><i>(Taida Golden Manager x Diamond Beauty)</i></p> <p>Brilliant yellow flowers with full form & heavy substance – highlighted just around the column with a bold harlequin accent ! We are really excited to see this new direction in yellow harlequin breeding with consistent marks from one flower to the next – and the central harlequin accent makes it stand out from the crowd !</p> <p>TAIDA NURSERY, TAIWAN</p>	<p>PF</p> <p><i>Limited</i></p> <p>NEW !</p>	<p>\$ 25</p>
	<p>Phal. Taida King's Caroline 'A08309'</p> <p><i>(Ever-spring King x Ho's Little Caroline)</i></p> <p>At last year's TIOS show in Taiwan, we saw quite a range from this multi-floral mini hybrid. Some showed the stronger influence of its candy-striped heritage while others carried the harlequin look from the Ever-spring King parent. All clones produce waxy long-lasting flowers on readily branching spikes.</p> <p>MULTI-FLORAL MINIATURE ! TAIDA NURSERY, TAIWAN</p>	<p>SP</p> <p><i>(1)</i></p> <p>4" pot</p>	<p>\$ 38</p>
	<p>Phal. Taida King's Caroline 'Taida Little Zebra' AM/AOS</p> <p><i>(Ever-spring King x Ho's Little Caroline)</i></p> <p>This particular clone of Taida King's Caroline has bold candy-striping on heavy substance flowers – long lasting and dramatic. The striping and ready branching habit comes from the multi-floral mini parent, Phal. Ho's Little Caroline, and the pod parent, Phal. Ever-spring King, adds heavy substance to the flowers & emboldens the striping due to its harlequin influence. Just awarded an 86 point AM/AOS at the March 2011 Taiwan Show !</p> <p>MULTIFLORAL MINIATURE ! PROTECTED BY PLANT PATENT TAIDA NURSERY, TAIWAN</p>	<p>PF</p>	<p>\$ 28</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Dtps. Taida Sunflower Boy 'Taida Apollo'</p> <p style="text-align: center;"><i>(Mei Dar Green x Taida Sunflower Diamond)</i></p> <p><i>This particular hybrid caught our eye across a huge greenhouse for its brilliant mid-size non-fading yellow flowers, each further enhanced by a central white halo & bold red lip ! Once fully mature, these plants will produce strong branching spikes in perfect proportion to their leaves. A great shot of heavy substance long-lasting sunshine flowers to brighten any collection !</i></p> <p style="text-align: center;">MULTI-FLORAL MIDI !</p> <p style="text-align: center;">TAIDA NURSERY, TAIWAN</p>	<p style="text-align: center;">SP</p> <p><i>2 spikes</i></p> <p><i>Limited</i></p> <p>NEW !</p>	<p style="text-align: center;">\$ 35</p>
	<p style="text-align: center;">Phal. Tying Shin Baby Smile 'A08068'</p> <p style="text-align: center;"><i>(Chingruey's Fancy x Tying Shin Cupid)</i></p> <p><i>A fabulous show-stopper in fiery red novelty/multi-floral breeding ! 2 – 2 ½" waxy flowers are produced in abundance on readily branching spikes due to the pollen parent, Tying Shin Cupid. Its intense red color and fragrance come from the pollen parent, Chingruey's Fancy. We've seen these plants readily produce basal keikis which, when left with the mother, create an outstanding display as all flower at the same time.</i></p> <p>NOTE: <i>Often we will leave previously flowered, still green, spikes on these plants since they continue to add more buds to that spike in addition to forming new spikes.</i></p> <p style="text-align: center;">WAXY NOVELTY MINI !</p> <p style="text-align: center;">FRAGRANT !</p> <p style="text-align: center;">FROM TYING SHIN NURSERIES, TAIWAN</p>	<p style="text-align: center;">SP</p> <p style="text-align: center;"><i>(1)</i></p> <p>NEW !</p>	<p style="text-align: center;">\$ 35</p>

	<p style="text-align: center;">Phal. Younghome Sunkist 'YH9742'</p> <p style="text-align: center;"><i>(Lih Jiang Girl x Kuntrarti Rarashati)</i></p> <p><i>The pollen parent, Kuntrarti Rarashati, is a famous breeder for orange and sunset-tone multi-floral minis ! Its yellow background is heavily overlaid with pink, leaving a narrow yellow picotee over all its segments, and giving it its beautiful sunset-tone color. Again, compact leaves and spikes, plus its great color on waxy long-lasting little flowers, make this a sure winner !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI !</p> <p style="text-align: center;">YOUNGHOME NURSERY, TAIWAN</p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;">2 spikes !</p> <p style="text-align: center;"><i>First bloomers</i></p>	<p style="text-align: center;">\$ 25</p>
	<p style="text-align: center;">Phal. Yu Pin Burgundy 'YPM5037' AM/AOS</p> <p style="text-align: center;"><i>(Little Gem Stripes x Yu Pin Red Angel)</i></p> <p><i>We awarded this particular clone, 'YPM5037', at the Taiwan International Orchid Show for its charmingly small flowers graced with crisply defined & boldly colored harlequin accents ! The plant, when awarded as a first bloomer, had produced two branching spikes bearing 40 flowers. Amazingly vigorous growers, already producing 2 spikes in just 2.7" pots, its flowers are the size of multi-floral minis & the patterning is vivid & striking for harlequin-influenced breeding. Multitudes of flowers on gently cascading spikes...tends to flower more than once a year !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI !</p> <p style="text-align: center;">YU PIN NURSERY, TAIWAN</p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;">1-2 spikes</p>	<p style="text-align: center;">\$ 28-33</p>

FIRST BLOOM ONE-OF-A-KIND NOVELTY SEEDLINGS (all are in 2.7" pots):

All of our novelty or select seedlings have flowered for the first time this summer ~ and with Phal. bellina in the background of many, as first bloomers they will initially produce only 1-3 flowers on their first spikes. For this line of breeding we leave any still-green spikes on the plants since they will most likely add more buds to these spikes in addition to producing new spikes at their next flowering. Some people choose to remove the initial spikes & give the energy back to the plant. However, we've never noticed (with this line of novelty-type breeding) that it makes much, if any, difference in the overall vigor of the plant since their breeding background carries the tendency to retain older spikes.

FRAGRANT MINIATURE CHINESE CYMBIDIUMS:

*All the species listed below grow & flower easily WITH our Phals under the same light & **WARMER** temperature conditions since they are miniature growing Chinese species, requiring much lower light, less space & will grow under warmer temperatures than their larger cousins ~ they also don't require the extreme chill of standard Cymbidiums in order to make their flower spikes and all tend to flower more than once a year, having no definite flowering season. One of these clones is just 6" in height – perfect for windowsill & under-lights growing !*

We are particularly fond of the green & yellow flowering varieties with either delightfully compact or elegantly tall flower spikes. We've found that the traditional pale pink-burgundy colored flowers are just too muddy to stand out and make a statement.

*The clone 'Tian Cao' also has the added charm of **VARIEGATED FOLIAGE**, meaning it's attractive, even when not in flower ! Variegated foliage comes at a higher price because it's greatly prized in Japanese & Chinese cultures, meaning the stronger the variegation, the more expensive the clone.*

Will readily produce multitudes of basal keikis for the ultimate display of its fragrant petite orange abundance !</i></p> <p style="text-align: center;">FRAGRANT MICRO-MINI</p> <p style="text-align: center;">DIVISIONS FROM OUR MOTHER PLANT !</p>	<p style="text-align: center;">BS</p> <p><i>Multiple growth plants</i></p> <p>NEW !</p>	<p style="text-align: center;">\$ 25</p>
	<p style="text-align: center;">Neostylis Baby Angel <i>(Lou Sneary x Neof. falcata 'Koukakuden')</i></p> <p><i>A great new miniature, already producing basal keikis on its blooming size plants ! Lou Sneary brings in the blue genes to this hybrid while the clone of Neof. falcata brings in a touch of pink. From those we've flowered so far, the influence of each parent has been pretty evenly divided – half the population has had pink tips to the flowers & a great pink tail while the other half has taken on the darker blue tips & tails from Lou Sneary. Either way, they're charming, vigorous growers and delightfully fragrant !</i></p> <p style="text-align: center;">FRAGRANT MINIATURE !</p> <p style="text-align: center;">ONE-OF-A-KIND HYBRID SEEDLINGS</p>	<p style="text-align: center;">BS</p> <p><i>Single growth</i></p> <p><i>2+ growths</i></p>	<p style="text-align: center;">\$ 25</p> <p style="text-align: center;">\$ 30</p>

	<p style="text-align: center;">Dendrochilum wenzelii 'Fishing Creek' CCM/AOS</p> <p style="text-align: center;"><i>(FRAGRANT MINIATURE Species)</i></p> <p><i>Endemic to the Philippines, this is another great miniature Dendrochilum producing multitudes of vivid red-orange flowers ! An easy grower alongside Phalaenopsis, this clone of which seems to double in size each year. Attractive upright narrow grass-like foliage producing inflorescences just packed with multitudes of flowers. These plants like to stay moist so we're growing them in New Zealand moss which they seem to love. Divisions from our exhibit mother plant !</i></p> <p style="text-align: center;">FRAGRANT MINI !</p>	<p style="text-align: center;">BS</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 28</p>
	<p style="text-align: center;">Fredclarkeara After Dark 'Sunset Valley Orchids' FCC/AOS</p> <p style="text-align: center;"><i>(Mo. Painted Desert x Ctsm. Donna Wise)</i></p> <p><i>Easily grown under Phalaenopsis conditions, this particular clone of Fredclarkeara After Dark produces tawny green flowers, heavily spotted maroon over all ! Its heavy substance flowers with a waxy texture lead to a long-lasting display. In 2005 this plant was the recipient of the Merritt W. Huntington Award as the most outstanding plant awarded an FCC/AOS. When granted its FCC, it was vigorously displaying 48 flowers on three pendant inflorescences, all emerging from just one pseudobulb ! A great exhibit plant and a stunner when in flower.</i></p> <p><u><i>Of special note:</i></u> <i>We shifted our exhibit plants of Fredclarkeara into New Zealand moss as an experiment to keep the deciduous growths plump & have noted that its even moisture supply helps keep the older pseudobulbs from dessicating while giving increased vigor to the new growths.</i></p>	<p style="text-align: center;">BS</p> <p style="text-align: center;"><i>Limited</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 48</p>

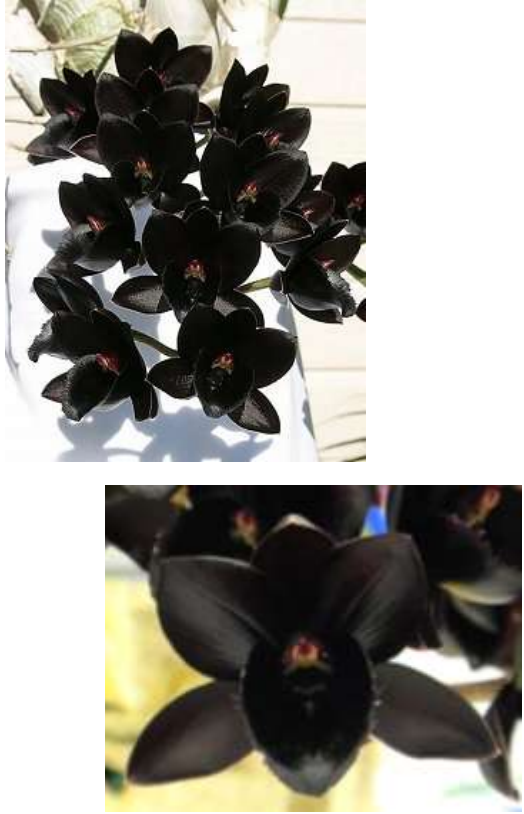

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Fredclarkera After Dark 'SVO Black Pearl' FCC/AOS</p> <p style="text-align: center;"><i>(Mo. Painted Desert x Ctsm. Donna Wise)</i></p> <p><i>Easily grown & flowered under Phal conditions, this particular highly awarded clone of After Dark is so dark it's almost BLACK! Produces cascading spikes of multitudes of waxy long-lasting flowers in late winter, beginning its new pseudobulb growth in early spring. Much easier to grow than either of its parents with no need to withhold water during its leafless stage since the pseudobulbs are still growing & photosynthesizing for future growths ~ we lightly water the surface of their medium all winter & resume normal drenching at the onset of new growth in the spring. In addition, the arrangement of the flowers is perfection as opposed to similar "black" hybrids where the flowers simply don't open well and arrange themselves on the spike properly.</i></p> <p><u>Two important Plus Factors to this hybrid:</u> <i>It's a vigorous grower ~ and it doesn't shoot its pollen when jarred or moved. We showed our exhibit plant of this clone in three different shows last winter with no loss of pollen despite all the trips to and from !</i></p>	<p style="text-align: center;">BS</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 48</p>
	<p style="text-align: center;">Guarisophleya (Slc.) Doris and Byron 'Christmas Rose' HCC/AOS</p> <p style="text-align: center;"><i>(Slc. Love Castle x C. Candy Tuft)</i></p> <p><i>Probably the best miniature Cattleya in the world today ! Delightfully fragrant and compact, it will grow happily under lower light Phalaenopsis conditions. This exquisite hybrid has multiple species in its immediate breeding background: C. loddigesii, C. aurantiaca, C. harrisoniana, C. trianae, C. labiata, C. coccinea and C. cinnabarina. Its heavy substance full-form pink flowers can be produced twice a year on a fully mature plant, the flowers lasting for months. During the cooler winter months with lower light, the flowers first open as soft pink, later maturing to a vivid pink (as seen in the photos) under bright light and warmer growing conditions. An amazingly vigorous grower. A deserving winner of the Best Mini Catt and a blue ribbon at a recent Taiwan International Orchid Society Show.</i></p> <p style="text-align: center;">FRAGRANT MINI !</p>	<p style="text-align: center;">BS</p> <p style="text-align: center;">Limited</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 45</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Habenaria Regnieri <i>(carnea x rhodocheila)</i></p> <p><i>A fabulous mating of two great species of Habenaria, many clones of which have been recognized with AOS awards ! Its beautiful silver-green spotted pattern on the wavy green leaves make this plant attractive, even when not in flower – and its compact growth habit allows it to fit readily into any collection. Large flowers are produced in the fall from the new spring growths bearing stunning salmon-pink flowers, creating up to 22 flowers on each inflorescence, the flower size being about 1 ¼". These plants are also benefitting from great hybrid vigor as a result of the mating of two species. Like our comments below on growing Habenaria rhodocheila, we follow the same culture for this little hybrid – and it, too, loves growing in New Zealand Moss ! Not available for the last two years, we were recently fortunate enough to obtain a few more from Taiwan.</i></p> <p><i>Being seedlings, not mericlones, there will be slight variation from one seedling to the next. But all have flowered this beautiful salmon-pink!</i></p> <p style="text-align: center;">MINIATURE !</p>	<p style="text-align: center;">B/F</p> <p style="text-align: center;"><i>Limited</i></p>	<p style="text-align: center;">\$ 48</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Habenaria rhodocheila <i>(Species)</i></p> <p><i>We have been amazed at how easy to grow this Habenaria species has been ! Even when not in flower, their foliage is beautifully marked. We've found that if we keep them just slightly moist with a light spritzing, not wet, when they go deciduous, they produce their spring growths readily. Allowing them to dry totally will most likely cause their loss over the winter – we know, we used to follow the culture sheets & did just that – and they never came back ! We've also discovered that trying to grow them in a bark mix is more than challenging, so we've switched to growing them in moss. This population has been extremely vigorous & is well worth adding to every collection. Plus, despite our initial doubts, they LOVE growing in the New Zealand moss ! We've been amazed at how really easy Habenarias are to grow & flower – just don't follow any of the culture sheets & you'll do great !</i></p> <p><i>Being seedlings, not mericlones, there will be some variation from one seedling to the next.</i></p> <p style="text-align: center;">MINIATURE !</p>	B/F	\$ 33
	<p style="text-align: center;">Lc. Simplicity 'Tara' <i>(loddigesii x longipes)</i></p> <p style="text-align: center;">Select clone !</p> <p><i>One of two plants we selected from an entire compost of this hybrid for its rich glowing color and wonderfully compact growth ! An amazingly easy grower, it tends to flower any time of the year under normal Phalaenopsis conditions. Great heavy substance flowers held nicely above the foliage & accented with a golden yellow lip !</i></p> <p style="text-align: center;">DIVISION FROM OUR MOTHER PLANT</p>	PF (1)	\$ 45

Hsinying Catherine)</i></p> <p data-bbox="678 317 1154 590"><i>Capable of flowering twice a year, this great new compact Cattleya has it all ! Its white flowers have their petal tips just lightly kissed with the same rich lavender-pink as its showy lip. A great mix combining the breeding heritage of C. Angelwalker, C. intermedia and Slc. Love Sound. Can produce up to 6 flowers on a single inflorescence and blooms faithfully on every new growth !</i></p> <p data-bbox="768 625 1068 680"><i>FRAGRANT ! COMPACT CATTLEYA !</i></p>	<p data-bbox="1224 163 1268 195">PF</p> <p data-bbox="1203 231 1292 258"><i>Limited</i></p>	<p data-bbox="1382 163 1446 195">\$ 58</p>
